

Save Money. Save Water.

We lower water bills up to 30% and reduce water usage by 6% to 9%. And we work 24/7 detecting water leaks. Our pricing is priceless. Literally. Zero capital required. Positive cashflow Day One.

Nurseries, Greenhouses and Water Consumption

A container nursery with 70% of the land in production under overhead irrigation could use 14,000 to 19,000 gallons of water per acre per day during the peak growing season. The WaveLytx Internet of H₂O lowers water utility costs, reduces water usage, increases the service

life of the water infrastructure and prevents water leaks to help achieve sustainability goals. The bottom line is, we help your bottom line. We strongly believe that every water drop counts.

WAVELYTIX: The Internet of H₂O

WaveLytix Internet of H₂O uses Artificial Intelligence (AI) to monitor, analyze, predict and detect water leaks real-time and 24-7 to lower water utility costs and improve water efficiency.

Real-Time Monitoring

- 24-7 water monitoring
- Access water data securely from anywhere
- Real-time alerts for high water consumption and leaks

Water Analytics to Minimize Water Waste

- Analyze water usage patterns hourly, daily, weekly, monthly, yearly to minimize water waste
- Compare water usage consumption across locations

Protects Your Property

- Lowers insurance costs with water leak detection
- Increases the service life of plumbing system components and reduces risks of water leaks

Professional Installation

- WaveLytix handles the entire install process

The WAVE Valve

3-in-1 Water Efficiency Valve

- *Compressible Flow Valve*. Compresses the accumulated air in the water line, reducing the volume of air prior to flowing through the water meter. The result is up to 30% savings on water usage and sewer costs
- *Adjustable Pressure-Regulating Valve*. Regulates water pressure to reduce water usage by 6% to 9%. This saves water, increases the service life of plumbing system components, and reduces risks of water leaks
- *Check Valve*. The single-coil spring mechanism uses a consistent spring-force design that responds rapidly to flow variation

Product Specifications

- Manufacturing: Made in the U.S.A.
- High Quality: 100% Medical Grade Stainless Steel (Series 3)
- Installation: One hour average install time
- Valve Sizes: Available in all sizes up to 16"
- Certification: NSF/ANSI/CAN 61, IAPMO Standard IGG 338
- Valve Warranty: 10 Years

CASE STUDIES

20.7% Water Cost Savings

The Gates Hotel • South Beach, Florida

23.5% Water Cost Savings

Houlihan's Bristol Seafood • Kansas City, Missouri

37.5% Water Cost Savings

Power Generation Facility 1 • East Coast, USA

ABOUT WAVELYTIX

WaveLytix Internet of H₂O monitors, analyzes and predicts water consumption real-time and 24-7 to lower water utility costs, improve water efficiency and provide leakage alerts. The Wave Valve further enhances water efficiency by **lowering water utility costs up to 30%** and **reducing water usage up to 9%**. We strongly believe that every water drop counts. And that's why our pricing is priceless. Literally. Zero capital required. Positive cashflow Day One.
